ROOTED

Sprint 3
Team 2

Ben Malone
Julien San Diego
Cyrus Santiago
Abigehl Slattery
Ken Sodetz

Problem

- Common to find home within groups or communities, but often fall out of the loop
- New members miss out on the opportunity to network with group’s alumni

Solution

- Provide a networking platform where:
  - Communities of people can keep a clean and well-documented history of all past members
  - Stories and accomplishments of members are preserved
  - Members can easily reach out to any other member
- Provide a visualization that displays relationships

DEMO

Challenges

- Different skill levels
- Merge conflicts
- Design decisions
  - Some routes had to be rewritten based on design decision changes
  - Underestimated how long tasks would take or how easy a task can be implemented
- Finding time where all members are available
  - Timing of sprint conflicted with interviews, exams, break
- Small bugs that were difficult to identify

THANK YOU
